

Polish Classification of Occupations and Specializations

Data publikacji: 29.09.2019 Data modyfikacji: 14.01.2022 Departament Rynku Pracy

What is the Polish Classification of Occupations and Specializations?

The Polish Classification of Occupations and Specializations is a structured collection of occupations and specializations on the labour market. It is a "physical inventory" of occupations identified on the labour market. The classification was developed based on the International Standard Classification of Occupations ISCO-08. The classification is updated every 2–3 years by amending the Regulation on the Polish Classification of Occupations and Specializations for the Labour Market Needs and its Applicability Scope to adapt to the changes taking place on the labour market (Polish and European) by introducing new occupations/specializations into it.

For the Polish Classification of Occupations and Specializations, an **occupation** was defined as a set of tasks (occupational activities) isolated as a result of the social division of labour, carried out permanently or with minor changes by the individuals and requiring relevant competences (expertise and skills) acquired by education or practice. The **specialization** was defined as a result of the division of labour within an occupation and it includes some activities of a similar nature (relating to the function performed or subject of labour) requiring extended or extra expertise and skills acquired by extra training or practice.

Please note: An occupation and a specialization should not be confused with a job.

What is the Polish Classification of Occupations and Specializations not?

The Regulation on the Polish Classification of Occupations and Specializations for the Labour Market Needs and its Applicability Scope **does not govern the aspects of licensing to work in a given occupation and of meeting the qualification requirements by people offering their services in a given occupation on the labour market, training and awarding qualifications by entities offering such services (e.g. courses or training)**. The classification is primarily a tool used for statistics, employment, job placement and career counselling, research, analyses, forecast and other studies concerning the labour market.

How to report a new occupation?

The requests concerning amendment to the Polish Classification of Occupations and Specializations can be filed by offices serving ministers, central offices, professional associations, social partners and other entities running their organized activity in the area of economy, labour market and education which are relevant in terms of subject matter to a given occupation or specialization.

Please note: The request cannot be submitted by a natural person.

The request should contain the grounds for the advisability of introducing the occupation into the classification, a description with a brief outline of the occupation and occupational requirements, as well as information on the required education and legal regulations pertaining to the occupation, should they apply.

Similarly, a request can be filed to remove an occupation from the classification or to change the occupation name or to move the occupation to another group, justifying its advisability.

Pursuant to Article 14(1) and (2) of the Regulation of the European Parliament and of the Council (EU) 2016/679 of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (GDPR), it is necessary to enclose a signed Applicant's Statement to every request, see the template form enclosed.
